EDUCATION

California Polytechnic State University

San Luis Obispo, CA

B.S. in Computer Science, Minor in Music

Expected June 2028

- **Relevant Coursework:** Data Structures, Discrete Math, Databases

EXPERIENCE

Data Engineering Lead

September 2026 - Present

Ataa Pay

San Luis Obispo, CA

- Architecting system design and scoping technical requirements for a data pipeline to scrape participating vendor websites and enrich records with geocode data, powering a map-based dashboard for a South African payments and social welfare platform.
- Delegating technical tasks across project members, coordinating scraping, enrichment, and dashboard integration workstreams.
- Designing the geocode enrichment process to standardize vendor location data for consistent mapping and dashboard display

Data Engineering Consultant

January 2026 - June 2026

EKI Environment and Water Inc.

San Luis Obispo, CA

- Led 5-person team building a Dockerized PFAS standardization tool using Anthropic/OpenAI APIs, raising non-detect identification from 0% to 81% and cutting QA false positives 53% across 1M+ records.
- Built Python ETL pipelines to clean, dedupe, enrich, and validate 1M+ records, with batched geocoding for 10,000+ coordinates.
- Designed normalized MySQL data model and SQL reporting layer powering Power BI, Tableau, and Streamlit dashboards.

PROJECTS

Cloud Music Analytics Platform | *Python, AWS Lambda, Kafka, AWS Athena, S3, Grafana, Terraform* **LINK**

- Built event-driven AWS/Kafka pipeline ingesting 165k+ ListenBrainz events with 30-min polling and at-least-once delivery via offset-after-write commits.
- Implemented checkpoint + Redis deduplication across poll cycles to prevent reprocessing.
- Provisioned infra with Terraform, including 1GB/query Athena cost guardrail and 90-day S3 lifecycle policy.

Data Infrastructure Diagram Tool | *TypeScript, React, ReactFlow, Dagre, Anthropic API, Supabase* **LINK**

- Built AI-native diagramming tool converting natural-language prompts to structured JSON via Anthropic API, rendered via Dagre/ReactFlow across 37 components and 11 categories.
- Redesigned Claude-to-frontend data contract, cutting edit-mode payload **40%** and input tokens **34%** via minimal node/edge schema.
- Hit 100% ambiguous-prompt detection on 20-prompt test set using fallback trigger to prevent clarification loops.

LEADERSHIP

Sub-Section Leader | *Cal Poly Mustang Band Drumline*

August 2026 - Present

- Leading full percussion ensemble rehearsals, coaching members, and maintaining full-ensemble excellence.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript

Data Engineering: ETL/ELT Pipelines, Data Modeling, Schema Design, Streaming Pipelines, REST API Integration

Cloud & Infra: AWS Lambda, AWS S3, AWS EventBridge, AWS CloudWatch, Terraform, Upstash Kafka, Amazon Redshift Serverless

Databases: PostgreSQL, MySQL, SQLite, DuckDB, Firebase Firestore

AI and APIs: Anthropic API, OpenAI API, REST API Integration

Tools: Docker, Git, Linux, Power BI, Tableau, Grafana
